Download instructions

1. **Create a directory in your PC. By example: C:/Bonifatiussampleset**

2. **Download the RAR-files as mentioned in the email confirmation and save them to the directory you just created.**

3. **After downloading you should unpack the rar-files. To do this you can use the program WinRAR. You can download it here for free: http://www.rarlab.com/download.htm**

4. **Go to the directory you just created (by example C:/Bonifatiussampleset) and click on the first RAR-file (bonifatiussampleset.part1) with the right mouse-button.**
   Choose 'unpack here'. The unpacking will take approx. 5 minutes, depending on the speed of your PC.

5. **The set now unpacks.**
   The unpacked set contains the following files:
   - **The directory MO_Stops. This directory contains all samples pro rank.**
   - **The file Bonifatius.organ. This file should be installed in Hauptwerk/GrandOrgue.**
   - **A written instruction to change the composition of the presets by yourself.**

6. **After unpacking you can delete the downloaded rar-files.**

END
